

Let's be responsible

Avoid direct contact

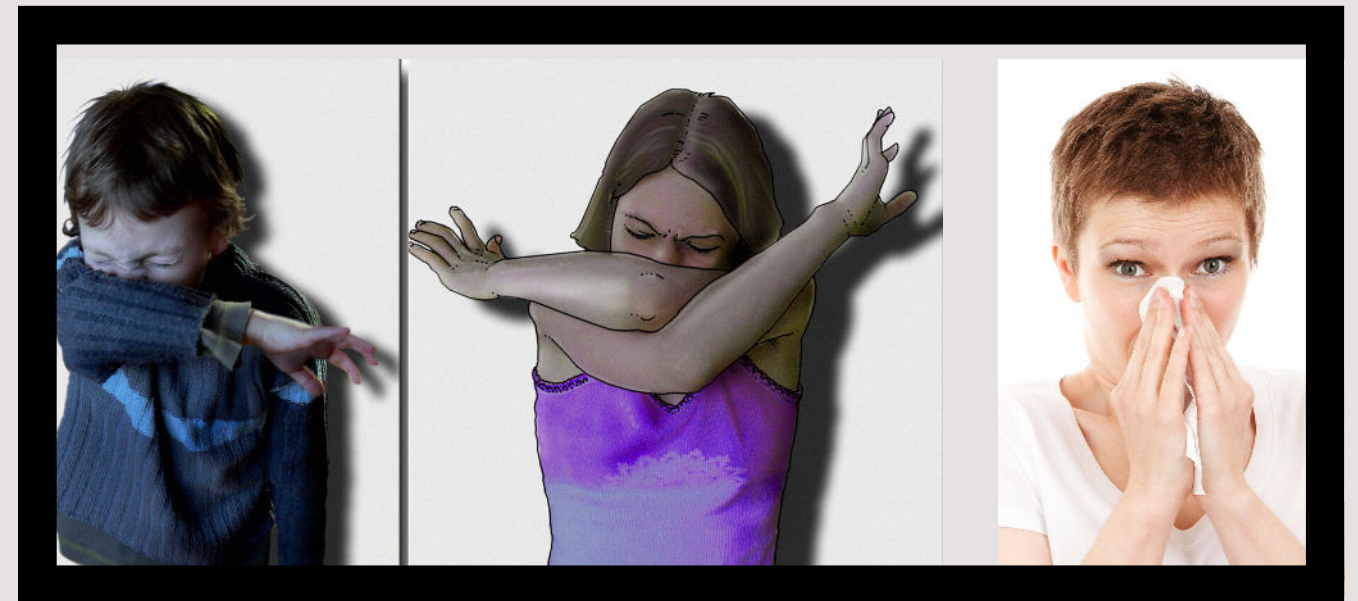

Saying hello can be done in different ways: Knocking your fists, your foot (shoe to shoe) or even shoulder to shoulder.

Avoid putting your fingers in your mouth, nose and eyes.

Cough or sneeze in your elbow

To avoid spreading Coronavirus through droplets, make a habit of coughing or sneezing into your elbow. Throw away your tissue quickly and rewash your hands.

Wash your hands regularly for 20 to 30 seconds

Before going to eat, drink or smoke; after going to the toilet; after changing a diaper; after removing wash gloves; when the hands are visibly dirty. Beware of often forgotten areas.

The maintenance staff must wear gloves when performing their tasks

And we change them regularly. Remember: Bacteria quickly proliferates in hot and humid environments. So when you remove the gloves, you wash your hands.

Wash and disinfect contact points at high risk of contamination

Let's help them, let's pick up, let's clear our surfaces!

We train our maintenance staff and educate customers.

We are **ALL responsible** for our actions. Let's ALL help ensure that the Coronavirus is stopped as quickly as possible.
